

Assignment 6

This assignment is to set up your NodeJS environment and create a simple node app for your webpage. Note that NodeJS will be also used for Assignments 7 and 8.

In this assignment, you should:

1. (5 points) Download and Install Node JS (<https://nodejs.org/en/>) on your local machine.
2. (5 points) Create a simple Node app for your personal webpage (from assignment 1).
Note: Don't use Express for this assignment (No credit will be given). Your web page needs to show a proper html file via URL:
 - a. ip_address:3000 -> index.html
 - b. ip_address:3000/index -> index.html
 - c. ip_address:3000/introduction -> introduction.html

Take three screenshots of your web browser accessing the above URLs.

Compress your files and upload the zip file on the blackboard. Within the submitted ZIP folder, you **MUST also include screenshots of your work running where both the Node Server screen & the browser are in the photo. Submission without screenshots will automatically lose 50% of the grade.**

No submission will be accepted by email.
